

Leisuretime Spa & Pool Covers are a leading manufacturer distributor of spa & pool covers for New Zealand.

ABOUT US

Leisuretime Spa & Pool Covers are a leading manufacturer distributor of spa & pool covers for New Zealand.

We specialize in the fabrication of spa & swimming pool covers using only high quality pool cover material.

Leisuretime Spa & Pool Covers design and manufacture to order an extensive range of high quality affordable pool cover systems and custom made spa pool covers for the harsh New Zealand climate and sell these direct to the public.

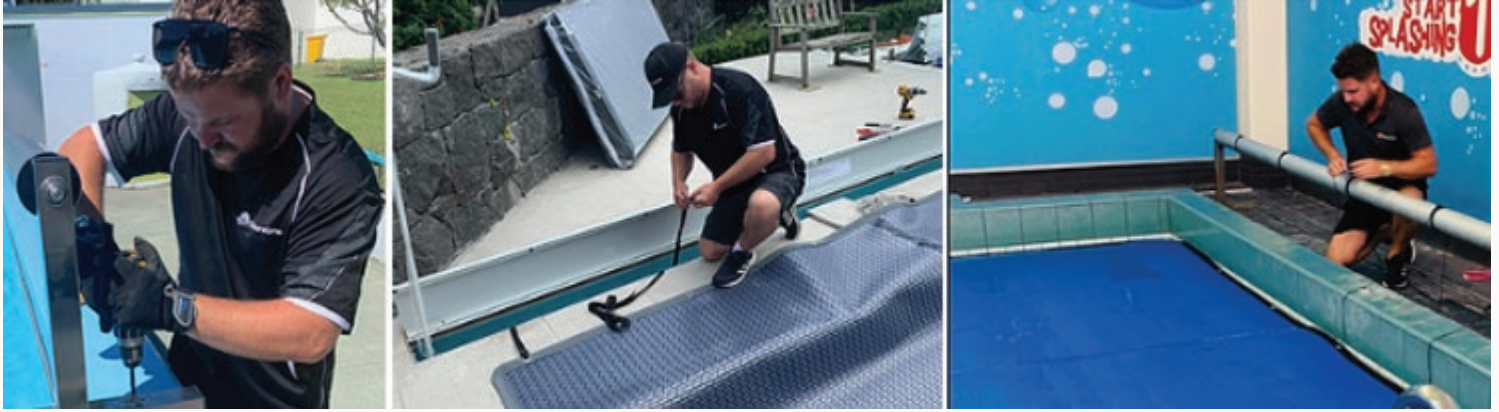

We can customise our products to suit each order and that means substantial savings to you because you don't have to buy material or accessories excess to your needs.

Our philosophy is simple... to supply the public with the best pool covering systems, after sales service and all at the best possible price available anywhere - that's why we can give you this promise: "You won't find a better quality spa & pool cover in New Zealand"

OUR SERVICE TECHNICIANS ARE ABLE TO OFFER YOU THE EFFICIENT, HASSLE-FREE SERVICE YOU'RE LOOKING FOR.

We offer a comprehensive service for the design, manufacture, supply and installation of spa & pool covers. Service includes site measuring and generation of drawings for each individual spa & pool cover.

COMMITMENT

We are committed to provide our customers:

- with the highest level of customer service and support in the industry
- with a simple and transparent quote process
- with quality covers that ensure the most efficient heating properties in their class

Geobubble UK has invested heavily over the last 20 years in researching heat transfer through different types of materials and colours to maximise heat transfer.

Developed to provide you and your family with a warmer pool that you can enjoy for longer periods throughout the year. You can trust in our products to deliver you a superior product that will last for years.

HARDCOVER SPA COVERS

style and function

Leisuretime spa hardcovers have a high thermal resistance and virtually eliminate evaporation. We supply new spa pool covers in a variety of colours and sizes. If you know the model of spa pool you own, then we can supply a new spa cover using our extensive list of patterns.

If you don't then we can custom manufacture to your spa's dimensions, ensuring the right size and shape is supplied. At Leisuretime all our hardcovers are New Zealand made and after 25 years of manufacturing, we can safely say they are constructed to survive New Zealand conditions.

NZ MADE SPA HARDCOVERS

BENEFITS OF A SPA COVER

- Provides superior insulation
- Reduces heating costs
- Virtually eliminates evaporation
- Easy to use
- F9/AS2 provides a means of compliance with Building Code Clause F9

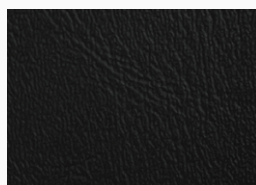

APPLICATION + CONSTRUCTION

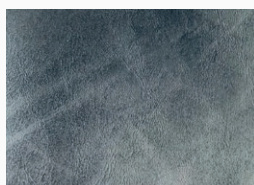

- Can be used on both residential and commercial spas.
- Spa hardcovers are made by inserting two high strength polystyrene foam sheets into a vinyl outer.
- The bottom of the spa cover is made of chlorine resistant P.E. plastic to eliminate bleaching.
- The handles are internally strengthened.
- Locking mechanisms are fitted to limit access to the spa.
- We use proven U.V. resistant vinyl (proven over 17 years of use).
- The central hinge is strengthened.
- The internal foams are supported across the centre with an aluminium channel.
- The internal foams have a 100 to 50mm taper to encourage rainwater to run off

SPA COVER UNIQUE FEATURES

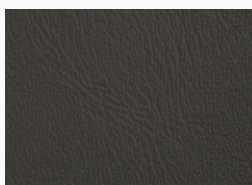

- Leisuretime covers are NZ Made
- Durable construction
- Tapered fit that allows water run-off
- Available in 13 colours

THERMALSHIELD THERMAL BLANKETS

The warmer the pool the more you'll use it

WHAT IS A THERMAL BLANKET

Thermalshield is a high strength, long lasting pool insulation blanket designed to prevent water heat loss and evaporation. Thermalshield is fabricated from physically cross linked polyolefin foam sandwiched between two layers of UV stabilised, polyethylene based polyfabric film.

The layers are flame bonded together and are extremely resistant to delamination, even at high temperatures. The closed cell foam layer provides excellent insulation and water repellence properties and is resistant to chemical degradation, while the outer woven layers give Thermalshield its excellent strength and durability. The composite is free of heavy metals, plasticisers and CFCs.

Email: Info@leisuretimecovers.co.nz

BENEFITS OF A THERMAL BLANKET

- Heat Retention
- Virtually eliminates evaporation
- Reduces heating costs
- Reduces chemical consumption
- Any shape possible

SUPERIOR PERFORMANCE

Thermalshield has higher thermal insulation properties (R-Values) compared to conventional solar blankets (around 50% higher), resulting in **significantly reduced pool heating costs**. If you are serious about pool heat you will be paying for heat to be pumped into the pool.

Thermalshield superior heat retention will ensure more of this expensive heat stays in the pool. Thermalshield is tough. The insulating foam core is protected by hard wearing outer layers specifically designed for the pool environment. Durable, tear resistant and with plenty of UV protection these covers are made to last.

THERMALSHIELD UNIQUE FEATURES

- Durable construction
- Closed cell foam laminated between woven P.E. film
- P.E. film is U.V. stabilised
- Suitable for both domestic & commercial situations
- 36 month warranty

ULTRA NEW TRIPLE CELL

A NEW ZEALAND FIRST IN POOL COVERS

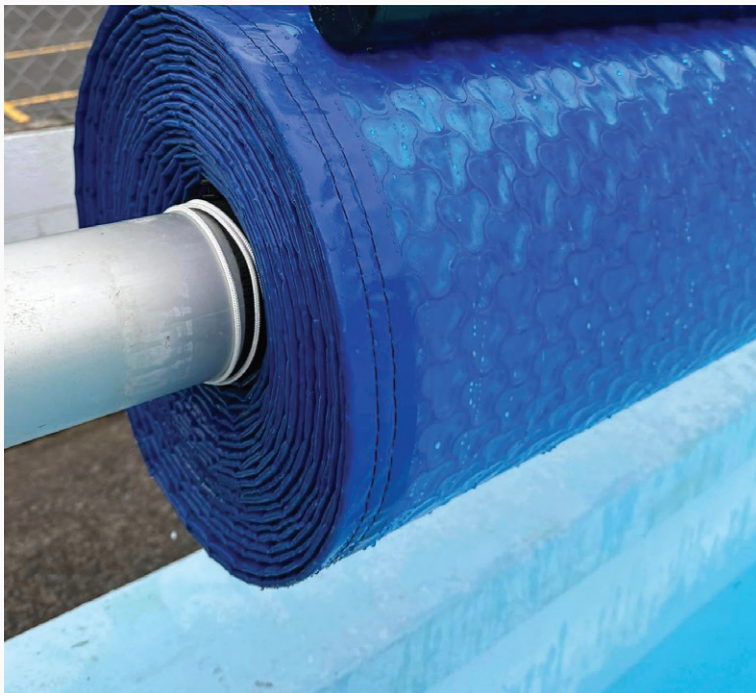

WORLD
FIRST
TECHNOLOGY

TRIPLE CELL® WORLD LEADING TECHNOLOGY

- Performance – large purpose designed solar cells provide greater heat insulation
- Designed and manufactured in australia, proven in the world's harshest conditions
- Easier to operate, easier on the eye.

SWIM LONGER IN A WARMER POOL

With Triple Cell® your pool stays warmer overnight and that's great news for all the family!

A GIANT LEAP FORWARD...

Triple Cell® has evolved over a '25 year' span and has now become a reality... thanks to vision and foresight in the continuous development of the world's latest pool blanket technology.

A LONGER LIFE & BETTER PERFORMANCE

- **SOLAR BLANKETS REDESIGNED**

Triple Cell is the first purpose designed and manufactured pool blanket... It breaks away from the traditional 'bubble' style and takes solar blankets to a new level.

- **TRIPLE CELL® REDEFINES 'SOLAR'**

Triple Cell® provides better all round insulating performance due to its greater "still air zone". Its unique cell design also offers more protection from chlorine attack and harmful UV rays.

- **TRIPLE CELL® IS THICKER... UP TO 60% THICKER ON THE BASE**

The Triple Cell® uses 610 micron plastic. The manufacturing process then ensures a more uniform thickness at the side, top and base of the cell - unlike standard bubbles where the thickness can be inconsistent causing lower life expectancy.

- **TRIPLE CELL® SITS FLATTER**

Triple Cell® lays flatter on the pool surface giving a better looking pool cover.

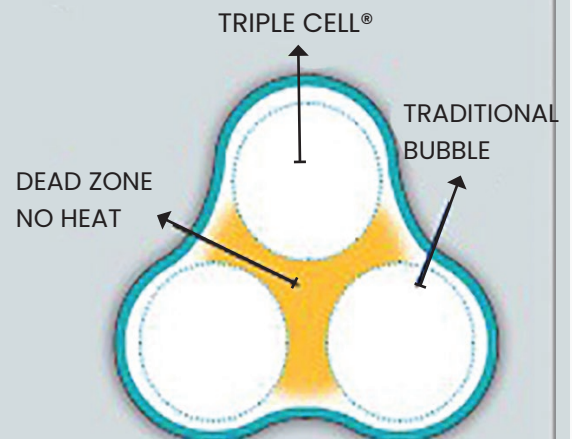

- **Saltsafe® & Chlorsafe®**

New technology is incorporated in the ultra new Triple Cell® Solar Pool Blanket to improve the covers ability to handle the demands of aggressive pool environments

- **TRIPLE CELL® HAS A SMOOTHER UNDER SIDE**

Triple Cell® has a unique bubble shape that makes it easier to drag covers over pool walls and lane markers. It is also easier for automatic cleaners to work beneath the cover.

- One Triple Cell® exceeds three standard round bubbles. More contact with the water means better insulation and lower heating costs - the pool stays warmer for longer
- With traditional bubbles, performance is reduced due to the shaped "dead zone" between the bubbles not being in contact with the water
- Triple Cell is manufactured in the same factory as the proven Soltego range. 30 years making pool covers means peace of mind

GEOBUBBLE SOLAR BLANKETS

The easy to way heat your pool

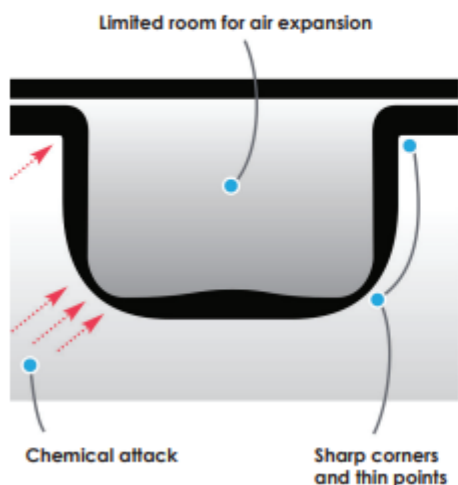

WHAY IS A SOLAR BLANKET?

Solar Blankets are high strength, long lasting pool insulation covers designed to prevent water heat loss and evaporation. Solar Blankets are made using U.V. and pool chemical stabilised Low Density Polyethylene (LDPE) plastic.

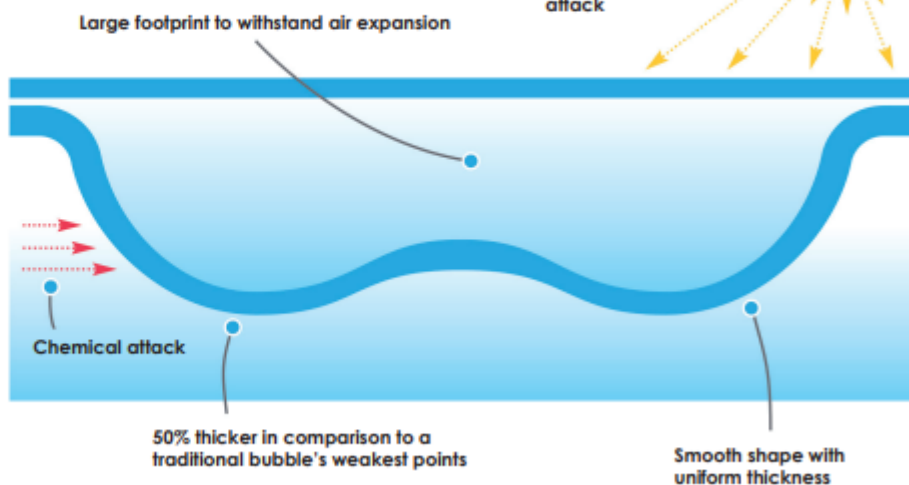

HOW DOES A GEOBUBBLE SOLAR BLANKET WORK?

Solar Blankets are translucent which allows radiated solar energy to pass through the cover to release heat into the pool water. Then overnight the air trapped in the bubble profile on the bottom side of the cover acts as an insulating layer to trap the heat in the pool.

BENEFITS OF A GEOBUBBLE SOLAR BLANKET

- Warmer pool water
- Reduced water evaporation
- Reduces chemical consumption
- Extends swimming season

MATERIAL SOURCES

Leisure Time only sources from proven reputable suppliers. We have been in business over 25 years and our long term relationships with proven suppliers give us high confidence in the product we sell.

The GeoBubble range is manufactured in England. They have an emphasis on R & D and partner with local Universities to develop innovative products. They are a global supplier with distribution partners all around the world.

Boom and boom pocket at pull out end

eliminates water
evaporation by
98%+

SOLAR BUBBLE COVERS HEAT THE POOL

- Saves up to 60% energy costs, limits heat loss, makes swimming more comfortable
- Ultra absorbent Blanket gives maximum absorption, enabling more solar energy to enter pool, better heating!
- Warms pool water: By 3 – 5 degrees or more in summer season
- It reduces evaporation: Cuts water use, saves on chemical costs
- Extends swimming season: Swim earlier in spring, later in autumn

WHY IS GEOBUBBLE UNIQUE?

- Unique patented design of two bubbles joined together by a structural waistline centre section.
- No sharp corners that could result in thin or weak points in the design.
- No stress points due to the bubble's smooth interconnected curves.
- 50% thicker than a traditional bubble material at its thinnest point.
- Increased resilience against UV rays and chemical attack.

PREVENTS EVAPORATION

Our materials reduce water losses through evaporation by working as a barrier between the water's surface and the atmosphere. By simply covering the pool with the material, **evaporation is reduced by over 98%** resulting in the preservation of the water resources and increased temperatures within the swimming pool.

INSULATING PROPERTIES

The material is comprised of two layers laminated together, the bottom layer makes up two thirds of the total thickness of the material and is formed into buoyant air cells that allow the cover to float on the water. It also acts as an insulator, retaining energy gained throughout the day **mitigating heat loss** from the pool.

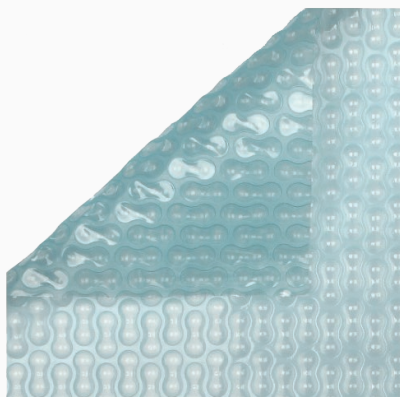

LIFE SPAN

The unique design has been scientifically developed to provide performance and longevity of the blended LDPE 4 polyethylene cover material. **AN ENERGY AND COST SAVING PRODUCT.**

Available in the following colours

French Blue 600 micron

Sol+guard clear 500 micron

Selective Transmission 500 micron

FABRICATION OF SPA &
SWIMMING POOL COVERS

POOL ROLLERS ELITE ELEGANCE

Making pool cover use easy

This reel is the result of a collaboration that combined decades of industry experience with a specialist design studio. The resulting reel has both function and form to give the owner a reel that is both aesthetically pleasing and easy to operate.

This design starts with the requirements of **strength and durability** then goes on to include unique features like the integrated pin braking system. If you want your poolside area to look good – then the Elegance is the right reel option for you.

BENEFITS OF AN ELEGANCE POOL COVER REEL

- Extends life of pool cover
- Convenient storage system
- Saves time and effort
- For most shapes of pools
- Drop pin braking system

LONG LASTING & EASY TO OPERATE

- 3 year structural warranty
- Available fully mobile or stationary “use and remove”
- An easy to use combination wheel/handle winding system
- Optional 360° rotation stainless steel castors for extra durability
- Optional 360° rotation nylon plastic castors
- Marine anodised aluminium to look good forever

Cool touch and easy to wind aluminum wheel.

Solid aluminum end plugs into an anodised, heavy duty aluminum tube. No plastic to break!

Self lubricating, maintenance free Teflon bushes. Solid 35mm axle.

Architecturally designed. Marine grade anodised aluminum frame.

Easy spin aluminum handle for quick winding.

Custom designed end caps.

Nylon or stainless 360° rotating castor wheels.

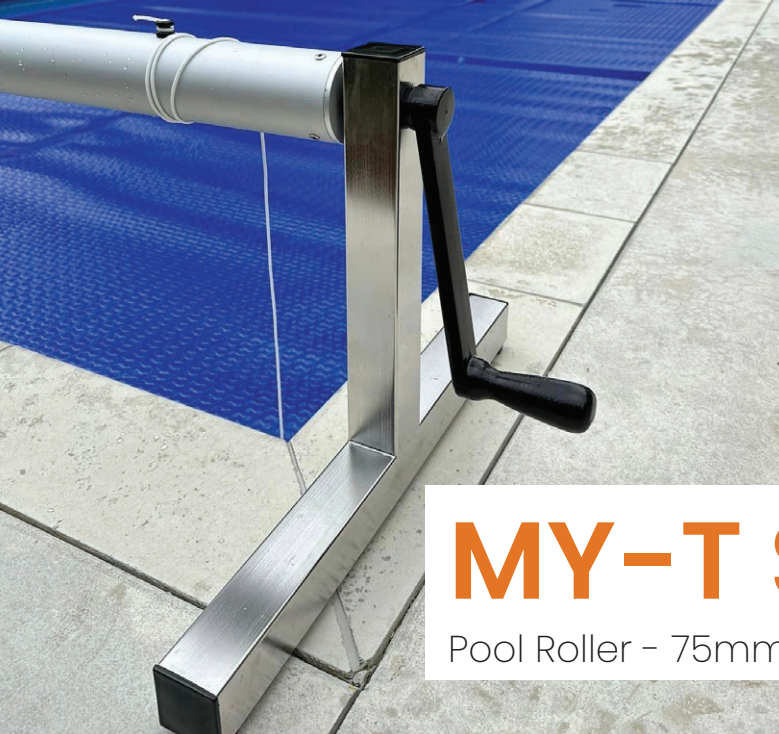

Exclusive stainless steel concealed drop pin brakes to perfectly position winder and prevent tipping or movement of the roller when winding the blanket.

ELEGANCE SERIES UNIQUE FEATURES

- Built to last using stainless & aluminium
- Easy, single handed use
- Proven on pools nationwide
- Stylish, unobtrusive design
- High stability while still free standing

MY-T SERIES

Pool Roller - 75mm Tube

HOW THE MY-T SERIES REELS WORK

The My-T series of pool rollers is the Leisuretime workhorse, entry level reel option.

Designed to be free standing on the deck at the end of the pool. Your pool cover is permanently attached to the reel with cords. You simply rotate the reel using the handle to roll the cover off the pool. A pool cover reel simplifies task of removing the cover reducing drag and damage to your swimming pool cover. Originally introduced in 1997, reels supplied in the late nineties are still going strong.

BENEFITS OF A MY-T SERIES POOL COVER REEL

- Extends life of pool cover
- Convenient storage system
- Saves time and effort
- For most shapes of pools

APPLICATION & CONSTRUCTION

MY-T 60 Small to mid sized residential pools
(up to 60 sqm)

MY-T 80 Mid to large sized residential pools
(up to 80 sqm)

MY-T 100 Large residential and small commercial
pools (up to 100 sqm)

- 50mm boxed stainless steel frame electropolished
- Aluminium hubs and handles
- Extruded marine anodised aluminium tube with 3mm wall
- Hard wearing, high speed plastic bushes

MY-T SERIES

UNIQUE FEATURES

- Built to last using stainless & aluminium
- Easy, single handed use
- Proven on pools nationwide
- Stylish, unobtrusive design
- High stability while still free standing

PLATINUM A FRAME POOL ROLLER (alloy)

The easier it rolls the more you'll use it.

Our Platinum Series of pool reels help you roll your cover on and off your swimming pool fast and fuss free.

Rotating the reel using the handle to roll the cover off the pool simplifies the task of cover removal and reduces dragging and damage to the cover.

UNIQUE FEATURES

- Built to last using cast and marine **anodised aluminium**
- Easy, single handed use
- Proven on pools nationwide
- Stylish, unobtrusive design
- High stability while still free standing
